

High Efficiency Low LID Mono PERC with Half-cut Technology

Front side performance equivalent to conventional low LID mono PERC:

-High module conversion efficiency (up to 19.4%)
-Better energy yield with excellent low irradiance performance and temperature coefficient

-First year power degradation < 2%

Glass/glass lamination ensures 30 year product lifetime, with annual power degradation < 0.45%, 1500V compatible to reduce BOS cost

Solid PID resistance ensured by solar cell process optimization and careful module BOM selection

Bifacial technology enables additional energy harvesting from rear side (up to 25%) Reduced resistive loss with lower operating current

Higher energy yield with lower operating temperature Reduced hot spot risk with optimized electrical design and lower operating current

Complete System and Product Certifications

IEC 61215, IEC 61730, UL 61730

ISO 9001:2008: ISO Quality Management System

ISO 14001:2004: ISO Environment Management System

TS62941: Guideline for module design qualification and type approval

OHSAS 18001: 2007 Occupational Health and Safety

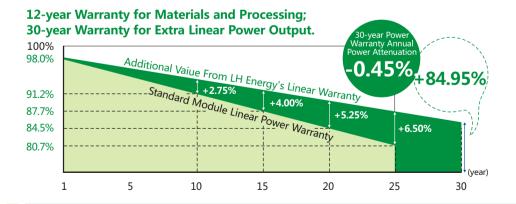

* Specifications subject to technical changes and tests. LH Energy reserves the right of interpretation.

Founded in 2010, LH Energy is the world's leading comprehensive solutions provider for solar energy.We believe close cooperation with our partners is critical to success. LH Energy now distributes its PV products to over 60 countries all over the world. LH Energy is able to provide exceptionml service to each customer in each market and supplement our innovative, reliable products with the backing of LH Energy as a strong, bankable partner. We are committed to building strategic, mutually beneficial collaboration with installers, developers, distributors and other partners.
